RESPONSE TO OFFICE COMMUNICATION
Docket No. GP091-02.UT

Comments

A notice of non-responsive amendment (Paper No. 35, mailed August 8, 2003) was issued in response to Applicants' amendment filed on May 29, 2003 (Paper No. 34). The notice stated that the amendment was incomplete because certain "regions" in the sequence of Figure 2 were not identified with a Sequence Identifier Number.

Applicants' representative communicated by telephone with the Examiner on August 18, 2003 explaining that Sequence Identifier Numbers were already provided, as described in Paper No. 34, and that Paper No. 35 appeared to be requesting separate Sequence Identifier Number(s) for features contained within the identified sequence. Therefore, Applicants' representative requested clarification or a telephonic interview to resolve this issue so that examination of the application could proceed.

The Examiner communicated by telephone with Applicants' representative on August 21, 2003, stating that no additional Sequence Identifier Number was needed and that the notice of Paper No. 35 would be withdrawn.

Applicants have not yet received an Office communication withdrawing the notice. Therefore, Applicants are filing this response to timely reply to the Office communication of Paper No. 35, consistent with the Examiner's statements of August 18, 2003.

Applicants respectfully request entry of the amendment of Paper No. 34 and seek allowance of the application. If any issues remain that can be resolved by a telephone interview, the Examiner is invited to contact the undersigned at the telephone number shown below.
